Note : All goods will be tested in compliance with current A.S.T.M standards. The test voltage for each item will be set according to the class designated for that item by the manufacturer. Each item will be dielectrically tested per A.S.T.M. standards. Test reports are to inform the purchaser of the results obtained and do not constitute any warranty. Tallman Equipment Company, Inc. assumes no liability for the condition, care, storage or use of any rubber equipment once it has left the test facility. Any special requests must be submitted in writing.

Rubber Date Regulations : Customer maintains full responsibility for management of "in service" dates, expiration dates and compliance with all regulations.
