

FEED TUBES

KEY FEATURES

- ✓ For easy install on A type grips
- ✓ Color coordinated to grip

Due to the tight construction of the A Type cable grip, we recommend using the Slingco Feed Tube when inserting cable or rope into the grips. For ease of use, our feed tubes are color-coded to match the A Type Cable grip.

Dimensions

The figures shown are indicative only. Fully dimensioned data-sheets are available on request. Nominal figures/actuals are as per data-sheet with tolerances of +/-5%. Please contact us if you have any questions.

Range dimension overlaps If the cable, rope or hose you have lies where ranges overlap, e.g. 1" when sizing is 0.5-1.00 and 1.00-1.5 we recommend that you select your cable grip to achieve break load first. If tensile strengths are equal or both adequate, choose the smaller of the two. Please contact us if you have any questions.
