DIGITAL INTERACTIVE EDITION

STRINGING BLOCKS

**RENT
ME**

DDIN Stringing Blocks are constructed of high-strength aluminum alloy, making them lightweight, strong, and durable. The urethane-lined sheaves prevent damage to the conductor and the anti-friction ball bearings packed with synthetic aviation grease make these blocks resistant to extreme conditions. All stringing blocks are available for rent through Tallman.

STANDARD BLOCKS

| <u>SIZE</u> | <u>PART NUMBER</u> |
|-------------|--------------------|
| 7" | DNCB-1 |
| 12" | DNSB12U |
