

MULTI-SHEAVE CABLE BLOCK

The DDIN Multi Sheave Cable Block is designed to support two or three cables at the same time before they are lashed to a suspension strand. This three-sheave block keeps up to three cables, 750 MCM or smaller, separated and properly aligned until they are ready to be secured to the messenger cable.

- Designed to hold cable separate before lashing
- Detent lock pin for easy operation while wearing gloves
- Separate sheaves for up to 3 cables
